Capability statement

Professional profile

I am an international development professional based in Trinidad and Tobago, with 12 years of experience across FAO and ILO and postgraduate training in development statistics. I combine programme delivery, economics, partnership development and institutional coordination to help organisations turn development priorities into practical action. My approach starts with understanding what prevents implementation, then aligning people, resources and evidence around achievable results.

Selected achievements

12 years of UN experience; up to five concurrent projects; US$2.1M managed or mobilised, including US$1.2M secured through proposals led. CV-reported, overlapping figures.

Core capabilities

Programme management; Results-based management; Economics & statistics; Resource mobilisation; Partnerships; Climate & sustainability; Facilitation; Institutional strengthening; Social development
